

OBJECTIVE

Analytical Cybersecurity Graduate Practitioner with hands-on technical experience in network defense, security monitoring, Active Directory administration, and incident response fundamentals. Proven track record across technical support, system diagnostics, and digital community moderation, demonstrating strong skills in access control, log analysis, and threat detection. Combines academic excellence (Summa Cum Laude) with practical experience using tools like Wireshark, Kali Linux, Nmap, Docker, and Windows Event Viewer. Seeking to leverage end-user security awareness, system administration, and technical troubleshooting skills as a Junior SOC Analyst or Security Operations Specialist

EDUCATION

MASTER OF SCIENCE IN CYBERSECURITY

DeVry University
In Progress — Expected February 2027

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY & NETWORKING

Cybersecurity Concentration —
DeVry University
Graduated August 2025 — Summa
Cum Laude

ASSOCIATE OF SCIENCE IN INFORMATION TECHNOLOGY & NETWORKING

DeVry University
Graduated December 2023 — Honors

Joey R. Ledezma

CYBERSECURITY GRADUATE STUDENT / SECURITY LAB PRACTITIONER DeVry University | May 2021 – Present

Developed hands-on cybersecurity and IT infrastructure experience through graduate-level coursework, enterprise security labs, virtualized environments, and independent projects. Designed Windows, Windows Server, Linux, Active Directory, VMware, and VirtualBox environments while practicing system administration, network configuration, system hardening, vulnerability assessment, log analysis, security monitoring, and incident response. Built Red Team/Blue Team environments using Windows Server 2022, Active Directory, Kali Linux, Metasploit, Nmap, and Wireshark for security testing and network analysis. Applied NIST Cybersecurity Framework and CIA Triad principles to defensive exercises and security architecture. Developed Docker-based security environments and projects involving threat detection, network defense, security monitoring, automation, and technical documentation. Maintained a cybersecurity portfolio documenting security research, technical projects, and professional development.

PROFESSIONAL EXPERIENCE

Social Media Intern / Content Editor | Remote | March 2024 – August 2025

- Structured and administered Discord server permissions, role hierarchies, and governance policies to prevent unauthorized access and maintain platform safety.
- Moderated online content environments and monitored community activities to ensure policy compliance and manage security/abuse concerns.
- Utilized web traffic and audience analytics to evaluate platform trends and optimize engagement strategies.

Geek Squad Agent | Best Buy | Sept 2017 – May 2021

- Delivered technical support, malware remediation, and OS configuration for 8–12 clients daily across Windows, macOS, and home network environments.
- Performed root-cause hardware and software diagnostics, network connectivity troubleshooting, and system recovery procedures.
- Educated end-users on account protection, credential security, multi-factor authentication, and safe computing practices.
- Maintained strict data privacy standards and confidentiality when servicing sensitive customer systems.

SKILLS

Cybersecurity: Security Operations • Threat Detection • Incident Response • Vulnerability Assessment • Network Security • Log Analysis • Security Monitoring • Defense-in-Depth • CIA Triad • NIST Cybersecurity Framework

Networking: TCP/IP • LAN/WAN • DNS • DHCP • VPN • Subnetting • Firewalls • IDS/IPS • Network Troubleshooting • IoT Networking

Systems Administration: Windows 10/11 • Windows Server 2016/2022 • Linux • Active Directory • Group Policy • User/Group Management • Permissions • System Hardening

Security Tools: Kali Linux • Metasploit • Nmap • Wireshark • Windows Event Viewer • Active Directory • VMware • VirtualBox • Docker

Programming & Automation: Python • Bash • PowerShell • SQL • C++ • Java

Cloud & Infrastructure: AWS Fundamentals • Azure Fundamentals • VMware • VirtualBox • Docker • Cloud Identity & Encryption Fundamentals

IT Support: Hardware Diagnostics • Operating System Support • Software Deployment • Network Troubleshooting • Customer Technical Support • Technical Documentation • SOP Development

PORTFOLIO

Sithbusiness.com

Customer Support Agent – Netflix Support | 24-7 Intouch | Sept 2016 – July 2017

- Resolved 40–50 customer cases daily involving identity verification, account security, and device troubleshooting.
- Enforced account privacy and security compliance protocols during authentication and access management calls.

Second Shift Lead Logistics | Halliburton | March 2014 – August 2016

- Managed second-shift inventory, hazardous materials documentation, and logistics operations for up to 5 full trailers daily.
- Executed Standard Operating Procedures (SOPs) and risk-management protocols in a high-compliance industrial environment.

LEADERSHIP & COMMUNITY

- Peer Mentor: Provided technical guidance and academic mentoring to cybersecurity students on core concepts, coursework, and lab environments.
- JROTC Platoon Leader: Coordinated leadership activities, team operations, and volunteer community initiatives.
- Member: National Society of Leadership and Success (NSLS).
- Community Advocate: Participated in environmental education and community advocacy initiatives.
